**Subject: Invitation to review and provide comments on the draft guidance on the possible impact of climate change on the work of the Persistent Organic Pollutants Review Committee**

By its decision SC-5/11, the Conference of the Parties to the Stockholm Convention forwarded the report of a study entitled “Climate change and POPs: Predicting the Impacts”, to the Persistent Organic Pollutants Review Committee, to consider the possible implications of the inter-linkages between climate change and persistent organic pollutants for the Committee’s work.

The above report was the outcome of a review of existing information and data on the inter-linkages between climate and persistent organic pollutants from a global perspective, undertaken by an expert group to support the work of the global monitoring plan implemented under the Convention related to the effects of long-range transport and climate on observed levels of persistent organic pollutants. The study is available on the Convention website (<http://chm.pops.int/tabid/1580/Default.aspx>).

At its seventh meeting held in October 2011, the Persistent Organic Pollutants Review Committee concluded that a better understanding of the inter-linkages between persistent organic pollutants and climate change was relevant for its work. The Committee thus established an intersessional working group to develop guidance on how to consider the possible impact of climate change on its work and requested the working group to focus its work on the above-mentioned study and other relevant literature. The intersessional working group accordingly developed the attached draft guidance on the possible impact of climate change on the work of the Committee.

You are invited to **review and provide your technical comments on the attached draft guidance on the possible impact of climate change on the work of the Committee** to the Persistent Organic Pollutants Review Committee by **30 June 2012**.

Submissions will be appreciated in electronic files by e-mail to: [ssc@pops.int](mailto:ssc@pops.int) and [awarmuth@pops.int](mailto:awarmuth@pops.int).
